The Lipman Nurit 8000

Why Lipman Nurit 8000?

Designed primarily but not only for the delivery and restaurant market business segments, the NURIT 8000 is the newest, smallest and most powerful internet-enabled wireless handheld payment terminal from Lipman USA, Inc. The unit is just a little bit larger than a postcard.

Lipman's 4th generation wireless terminal is a "Palm-like" payment terminal that allows a customer's card to remain in his or her possession during the entire payment process. The NURIT 8000 supports all traditional card payment functions, in addition to providing a powerful new e-commerce internet framework with improved revenue-generating capabilities. Great effort has been invested by Lipman's engineers to provide the payment community with a powerful and easy-to-use tool that facilitates the increase of revenues, but substantially decreases operational costs.

8000 Features:

- Supports a full range of payment types
- Customer controls electronic transaction process at all times
- Communicates with PC's when equipped with an optional ultra-miniature Infra-Red (Ir-Da) transceiver unit
- "Palm-like" functionality using optional, integrated touch screen, easy to use interface and open-platform architecture
- Enables performing smart and/or magnetic transactions at the highest level of security without ever having the card leave the customer's hand
- 128 x 128 pixel back-lit display capable of displaying graphics; touch screen to enhance user interface and enable electronic signature capture
- 18-button highly readable back-lit keypad that speeds up the payment transaction process
- Extremely reliable, fast graphics thermal printer with "easy-load" paper feed mechanism
- Rechargeable internal Lithium-Ion (Li-ion) battery pack for over 200 transaction processes per charge
- Dual-track bi-directional 1 and 2 magnetic card reader (tracks 2 and 3 optional)
- Built-in EMV compatible smart card interface; up to two 7816 SAM modules (optional)
- Radio modem interface enabling communication with latest cellular technologies
- Built-in antenna
- Built-in secure PIN pad
- External cradle unit for fast charger, line modem and optional serial ports
